How to Create Your Own Custom Greeting Video

STEP 1: Get ready the raw materials
Authoring software used: MS PowerPoint, Office 365

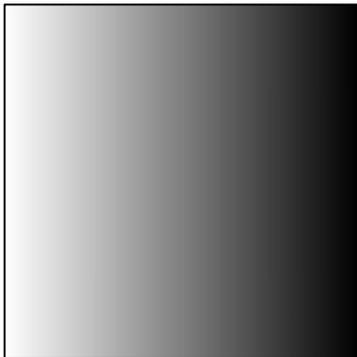

Embed video into PowerPoint
Credit: https://pixabay.com/videos/id-5269/

Customize your greeting message (color doesn't matter)
Font type used here: Arial Black

Create black color shape with a gradient fill (2 points):
100% transparent (L); 0% transparent (R)

STEP 2: Create a custom shape
Duplicate this slide and follow the instructions below:
- Click on background shape first (this is the base)
- Click on text box second (this is the portion you're cutting out)
- Go to Shape Format > Merge Shapes: Subtract
- You'll get a custom shape with the words cut out

STEP 2 (result): Custom shape
(Duplicate the previous slide and follow the instructions listed there)

STEP 3: Export as video
- Embed the background video behind the custom shape
- SAVE this slide alone AS a NEW file (i.e., remove all the previous slides)
- Export the new single-slide file as a new video

P.S. Do you want to make slides that leave a lasting impression on your learners? Just by following a few simple rules of photography that smart presenters do? In 5 days, you can do that. Enrol now for **FREE** at https://www.advanteach.com/make-photogenic-slides.html
